

AMENDMENTS TO THE SPECIFICATION

Page 8, please amend the paragraph beginning at line 7 by rewriting same to read as follows.

A1
FIG. ~~[[7A]]~~ 7 shows the data structure of processing condition data in the information processing apparatus of the present invention;

Please delete the paragraph beginning at line 10.

~~FIG. 7B shows shaping conditions in detail of the data structure of the processing condition data in the information processing apparatus of the present invention;~~

Page 22, please amend the paragraph beginning at line 5 by rewriting same to read as follows.

A2
Referring to ~~FIGS. 7A and 7B~~ Fig. 7, the processing condition data PCD includes file information 401, category information 402, the service identifier 403, a service name 404, icon information 405, directory information 406, the address information 407, shaping conditions 408, etc. The file information 401 includes information about the date of creation of the processing condition data PCD, the date of update of the processing condition data PCD, a file version number, etc. The category information 402 indicates the service content provided by the processing condition data PCD. Based on the category information 402, the processing condition data PCD is stored in a predetermined location in the processing condition data area 114. Network servers on

A2
the information network 10 are respectively tagged with their own service identifiers 403. The service name 404 is derived from the service provided by that network server.

Page 23, please amend the paragraph beginning at line 7 by rewriting same to read as follows.

A3
~~Referring to FIG. 7B~~ As shown in Fig. 7, the shaping conditions 408 include format conditions 408a, tag analysis conditions 408b, and imaging conditions 408c. The format conditions 408a include a character count per line condition defining a character count per line in shaped text data, and a line boundary character condition setting a character that is prohibited from being positioned at the start of a line or the end of the line. The format conditions 408a also include file conditions that set the type of image data of an image contained in the page data PD, for example, JPEG, GIF, etc.
